SOFTWARE ON AWS MARKETPLACE

# InsureAI Underwriting Hub

The underwriting workbench for MGAs, coverholders, syndicates and P&I clubs: one trusted record from broker submission to settled premium.

InsureAI replaces re-keying, spreadsheets and email chasing with a single trusted record of each risk, and a clear next step for every person in the team.

### Reads every submission

Emails, MRC slips, ACORD forms, PDFs and spreadsheets, with the source words and page for every value.

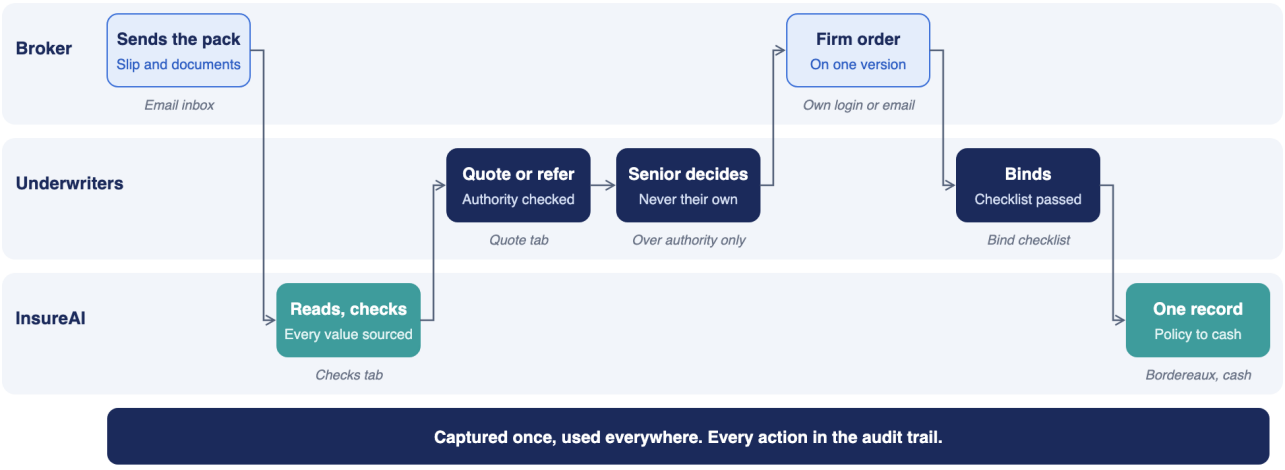

### Your appetite and authority

Checked on every risk, with referrals to the right person and no self-approval.

### Quote to cash

Quote versions, firm order and bind, premium schedules, cash matching and Lloyd's bordereaux.

## How a risk flows through InsureAI

### Submissions read with evidence

Broker emails and every attachment are read automatically into structured data. Every value shows the exact words and page it came from. Where documents disagree, the underwriter sees one clear question with InsureAI's suggestion. Fleet lists, IMO checks and five-year loss records are analysed for marine, cargo and P&I business.

### Your appetite, your authority

Your appetite rules and each underwriter's authority are applied to every submission. Anything beyond authority is referred to the right person with the reason. Nobody approves their own referral, and every decision is recorded.

### From quote to bind

Prepare and issue quotes, keep every version through the negotiation, record the broker's firm order with its evidence, and bind on a checklist. Brokers can give their firm order from their own secure login, seeing only their own business.

### Premiums, cash and reporting

Binding creates the premium schedule. InsureAI tracks what is paid, alerts on premium payment warranties, and matches cash from your accounting system, with a second person confirming every match. Premium and claims bordereaux follow the Lloyd's Coverholder Reporting Standards v5.2, with any gaps shown before you send.

### The Data Spine

Everything captured flows into one record per risk, aligned to ACORD, the MRC, Lloyd's CRS and the Core Data Record, and to records outside Lloyd's such as those used by P&I clubs and company markets. A trust scorecard shows how complete and verified your book is, and you can ask questions about the whole book in plain English.

### Built for the people who use it

Every screen leads with the next action. Help and Ask InsureAI are on every page. Roles follow your firm's structure, with segregation of duties enforced by the platform. Designed for modern devices, it works beautifully on tablets, including the iPad.

## Plans

| Plan | For | Includes | Price (12 months, ex VAT) |
|---|---|---|---|
| **Starter** | Small MGA or coverholder | Up to 5 users and 1,000 submissions a year; one class; submissions with evidence, appetite and authority, quote and bind, Lloyd's bordereaux | £15,000 |
| **Professional** | Growing MGA, syndicate team or P&I club | Up to 20 users and 5,000 submissions a year; all classes; plus finance and cash, Data Spine scorecard, broker logins, Ask InsureAI | £38,000 |
| **Enterprise** | Larger MGA or insurer | Unlimited users and submissions; dedicated environment; single sign-on; API and integrations; priority support | From £75,000 |
| **Extra submissions** | Any plan | Additional 1,000 submissions a year | £5,000 |

Prices in pounds sterling, excluding VAT. Also available in US dollars through AWS Marketplace, on the AWS Standard Contract and billed on your AWS invoice. Private offers are available for multi-year terms and early adopters.

> **Try it before you subscribe**

Start with the **InsureAI MGA Operational Assessment** or **InsureAI Pilot and Implementation**. Your use of InsureAI during the assessment and pilot is at no cost; your subscription begins only when you use InsureAI in production.

## Secure and cloud native

- Runs entirely on AWS in London, with each firm in its own secure space
- Encryption throughout and a full audit trail of every action
- Nothing to install or upgrade, and no servers for your IT team to run
- Works alongside your policy administration system and placement platforms

## Next steps

- Subscribe on AWS Marketplace, or ask us for a private offer.
- Or start with an assessment or pilot, with InsureAI free until you go into production.
